

Supply List

My Label Workshop

My Label Software loaded onto computer with all patches and updates

My Label dongle

Computer with power cord and mouse

My Label measuring kit

Pencil and paper

Good quality muslin for sewing the tunic

Since we will be taking measurements in class you will need to wear close fitting clothes such as a tank top and leggings with undergarments. No pantyhose, leotards or swimsuits should be worn as these create different shapes and waist-lines! Please wear clothes that can be slipped over these, such as a longer top, if you'd like to be more fully dressed.

We will measure each other and enter the measurements into the software. There will be homework on Thursday night for Friday's class. You will need to print the pattern for the tunic, cut it out and sew it together for fitting in Friday's class. Only the back, front and sleeves need to be sewn. No facings or hems need to be stitched.
